Hi!

I am a Front-end developer. Currently I am in the developing learning stage. I have a lot of interest in learning so I think I can develop my skills more.

Skills :

- **Expertise :** HTML5 | CSS3 | React | React-Router | JavaScript | Express.js | Tailwind.
- **Comfortable :** JWT | MongoDB | React Hook
- **Familiar :** Node.js | Next.js
- **Tools :** GitHub | Firebase | Netlify | Vercel | | MongoDB
- **Extra Skill:** Graphic Design

Project :

1. **Eatery-Cafe** – ([Live Link](#) | | [Client Code](#) | | [Server Code](#))

Features:

- Full firebase authentication system is used on this website.
- You will find all world top running safes on this website.
- MasterChef has a detailed description that you can't see without logging.

Technologies:- HTML | CSS | React-Router | Firebase | Express.js

2. **Avengers Playsets** – ([Live Link](#) | | [Client Code](#) | | [Server Code](#))

Features:

- This is a CRUD website, this website can be used by both buyers and sellers.
- The seller can add the product as he wants.
- This website contains some pages that cannot be used by all users, only logged in users.

Technologies:- HTML | DaisyUI | React-Router | Firebase | Express.js

3. **Melody Music** – ([Live Link](#) | | [Client Code](#) | | [Server Code](#))

Features:

- With JWT Token we have ensured data security.
- We have used our own Hook through which it is possible to do more work in less time.
- We have used card payment system on the website through which we can make money transactions from any bank.

Technologies:- HTML | CSS | React-Router | Firebase | Express.js | JWT | Strip Payment

Education:

Currently doing Honors from abudharr Ghifari College,
Sub: Mathematics.

Language:

Bangla, English, Hindi, Urdu
